prices," Said Mr Navneet Aggarwal, Director, Maxhill.

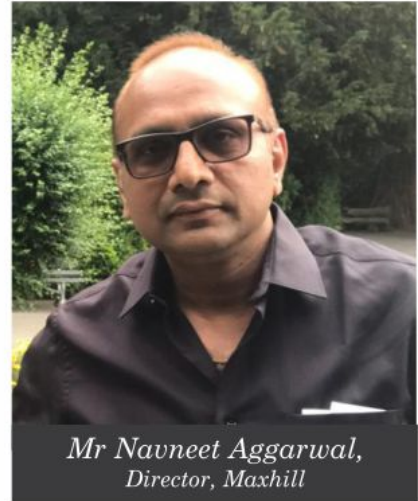

"One of our newest innovations apart from products is the concept of break bulks. We are proud to be the first wood panel distributor in India to import wood panels via break-bulk shipment with the goal of stocking enough stocks of various thicknesses and grades to offer all our customers spread PAN India with supply consistency and high-quality products at the most competitive prices," he added.

They are launching many new products after identifying market requirements. The products are listed below:

1.9 mm SANDED Whitish MDF E2: To cater to the growing requirements of high quality thin MDF. With the sanded substrate, we see a bigger market potential for the new product.

2.7 mm and 3 mm High Density Fibreboard 4 hours BWP Grade: A high density (880+ kgs/m³) substrate with a 4 hour BWP Grade that is ideal for Door Skin Application or pasting veneers. Applications are infinite with the new HDF BWP grade launched. Available in a large variety of sizes, we are looking to offer our customers a zero-wastage product.

16 mm and 18 mm HDHMR E2 V313 Grade: Plain High-density Fibre board with Natural/Green/Pink Pigment with HMR Grade coupled with V313 Cyclic Test to offer the best option in HDHMR E2 segment.

Mr Navneet Aggarwal,
Director, Maxhill

Standard and HMR V313 Grade:

Introducing Green and Black coloured HDF in Standard and HMR V313 Grade suitable for Routing, Laminating or to be used with clear lacquer for Interior decorative applications.

According to Mr Navneet Aggarwal, markets are a dynamic playing field and hence, one scenario never sustains. "We, as a brand, focus on the positive aspects while being mindful of what is going on within the industry. Currently, though we are seeing various challenges like shortage of raw materials, import freight increasing and more, we believe that there is a bright future for the industry and there is a lot of potential for growth in the foreseeable future," he added. "We aim to provide the best products and experience to everyone associated with us and hope to connect with more people through this exhibition."

IMPORTED WHITISH MDF BOARDS (Equivalent to Pine MDF)

Best for your kitchen ..

Its uniformity makes an ideal fit for creating aesthetically pleasing and highly functional modular furniture.

▶ **MR
GRADE**

▶ **BWP
GRADE**

Made from multiple press technology which makes it more accurate, smoother, uniform & better than a regular plywood.

THICKNESS - 16mm

SOFT BOARDS

Insulation Board

Features & Uses

- It is Made of wood fibres & it is soft, light colored & light weight sheet material.
- They have excellent sound absorbing capabilities & best to be used as acoustic boards.
- Highly suitable for ceiling/partitions/carpet underlays & wall linings particularly where reflected sound is to be reduced i.e in recording studios & auditorium.
- When aesthetically covered with fabrics , it is used as display board in stores/homes/offices & schools.
- Very commonly used as pin board for display or notice boards .

Thickness : 8mm / 10mm

PVC FOAM BOARDS

Advantages of using PVC foam boards:

- 1. Water Resistance**
- 2. Corrosion Resistance**
- 3. Fire Resistance**
- 4. High Strength & Durability**
- 5. Easily shaped and painted**
- 6. Pocket-friendly**

Uses of PVC Foam boards:

- 1. Used for the ceilings of Cars, Buses or Trains**
- 2. Widely used for making home and office furniture**
- 3. Used to build external wall panels**
- 4. Home interiors can be designed using PVC foam boards**
- 5. Used in sign boards and outdoor advertising kiosks**
- 6. Used in Construction, Garage Doors, POP Displays, Exhibit Spaces & Signage**
